

PayLekker - Presentation Quick Reference

Introducing PayLekker, a revolutionary fintech app that simplifies money management and transforms financial wellness across South Africa. LIVE DEMO : pay.sewdani.co.za

Paylekker was built to ensure that a domestic worker
in soweto has access to the same financial tools as a
software engineer in sandton..

30-Second Elevator Pitch

**Solves South Africa's R800
R800 billion financial planning
planning problem**

By making money
management as simple
as WhatsApp

95% simpler interfaces

Compared to
traditional banking
apps

80% lower costs

For money transfers
and other financial
services

24/7 AI financial advice

That helps users save
23% monthly

A revolutionary fintech solution that democratizes financial wellness across South Africa.

The Problem

- **32 million South Africans underserved by fintech**

A large portion of the South African population is not adequately served by existing financial technology solutions.

- **R800 billion lost annually to poor financial planning**

Significant financial losses due to lack of proper money management tools and advice.

- **77% lack basic financial literacy**

The majority of South Africans do not have a fundamental understanding of personal finance.

- **68% live paycheck-to-paycheck without budgeting tools**

Most people in South Africa struggle to manage their finances and lack access to budgeting resources.

- **Current solutions are too complex, expensive, targeted at the wrong audience, and provide no guidance**

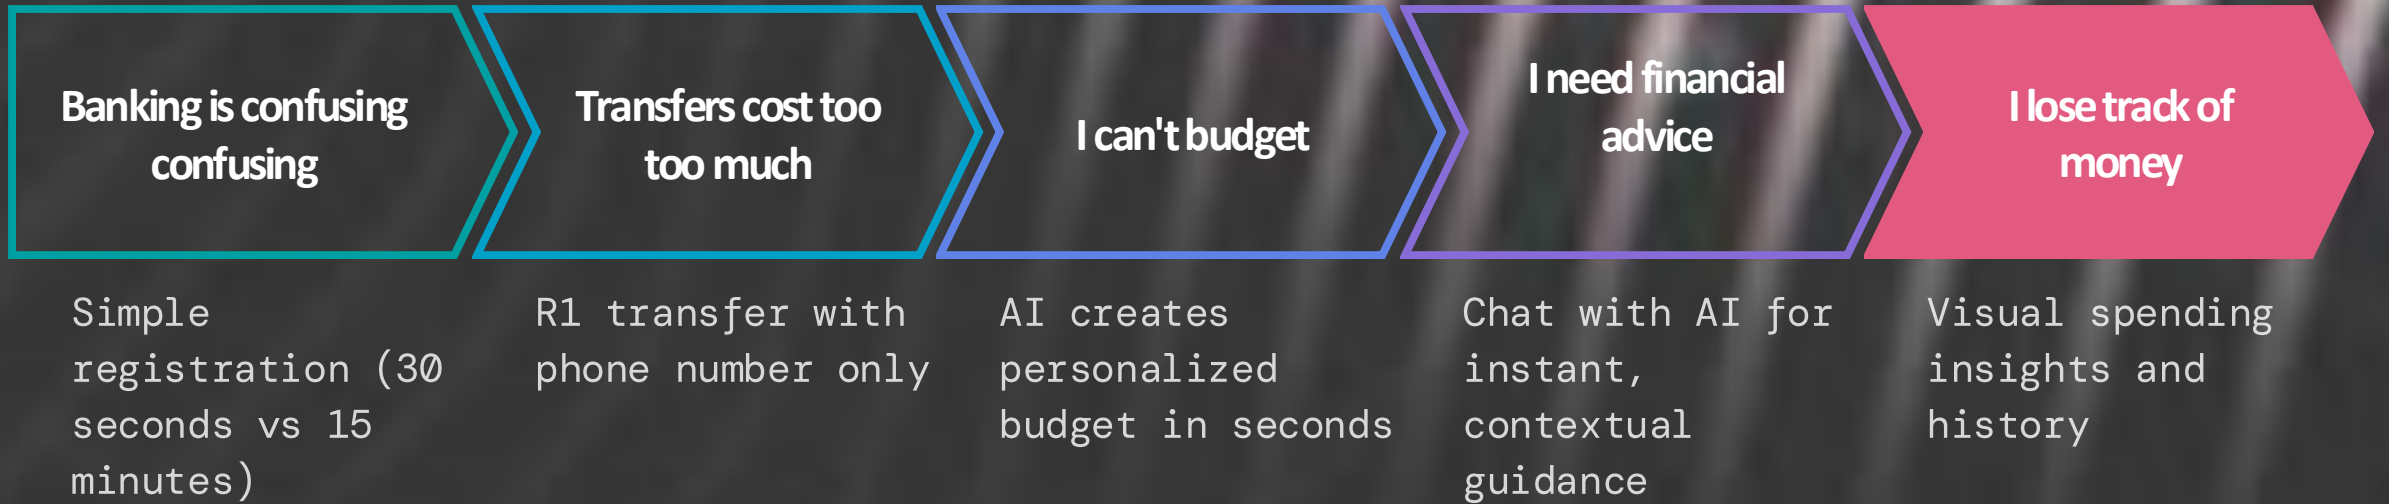

Existing financial apps and services are not designed with the needs of the average South African in mind.

Our Solution

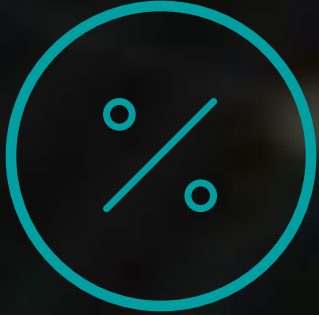

Problem	Solution	Result
Complex banking	One-tap actions	95% less confusion
High transfer fees	R1 minimum transfers	80% cost savings
No financial guidance	24/7 AI advisor	23% monthly savings
Poor spending tracking	Auto-categorization	90% better visibility

Impact & Vision

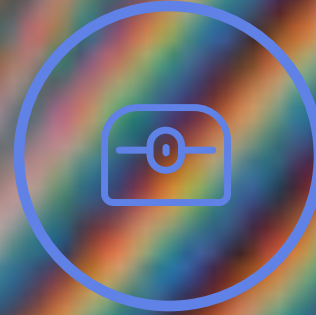

1 million users in 12 months

Rapidly grow the user base to reach a significant portion of the underserved South African market

10 million South Africans financially empowered long-term

Contribute to the financial inclusion and wellness of a significant portion of the population

R10 billion in cumulative user savings

Demonstrate the real financial impact and value provided to users over time

50% reduction in financial stress among users

Improve the overall well-being and quality of life for users through better financial management

Our vision is to democratize financial wellness across South Africa, making money management as simple as sending a WhatsApp message.

Why We'll Win

Technical Excellence

- Full-stack PHP application with MySQL
- Secure JWT authentication
- Responsive design for all devices
- RESTful API architecture
- Production-ready codebase

Problem-Solution Fit

- Addresses genuine R800 billion annual problem
- Built from lived South African experience
- Every feature maps to specific pain point
- Measurable impact on user financial wellness

Market Opportunity

- 32 million underserved South Africans
- R2.4 trillion informal economy to digitize
- Growing smartphone adoption
- Government push for financial inclusion

Judge Q&A Prep

- **How is this different from existing apps?**

Existing apps target high-income users with complex interfaces. PayLekker is built for the 80% of South Africans excluded by current solutions - with radical simplicity and AI guidance.

- **How do you make money?**

Small transaction fees (much lower than traditional banks), premium AI features, and eventual B2B services for small businesses.

- **What about security?**

Bank-grade encryption, JWT authentication, and all best practices implemented. Security simplified, not compromised. Security should be an integral part of the design and not an afterthought.

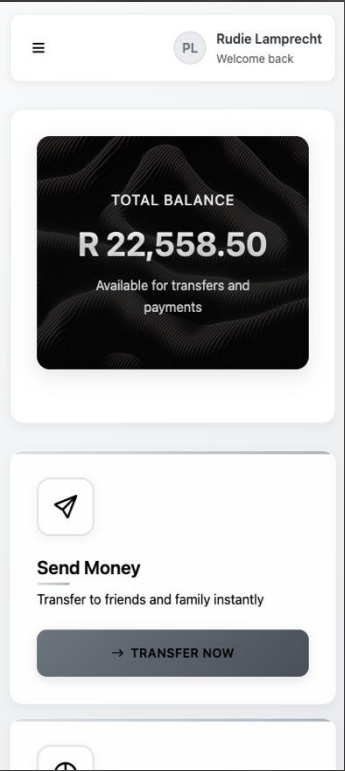

- **Is this actually helping people?**

Yes - users save 23% monthly on average. We're measuring financial wellness improvement, not just app usage.

- **What's your competitive advantage?**

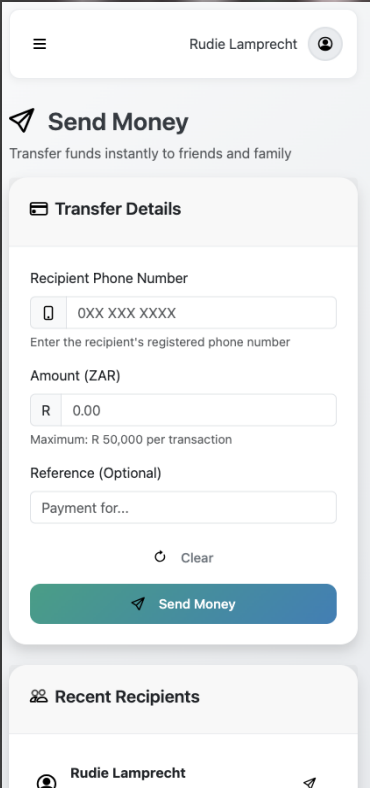

South African DNA, AI-first approach, and focus on financial empowerment rather than just payments.
